

LIFT OFF CORNS!

Drop Freezone on a touchy corn, then lift that corn off with fingers.

Doesn't hurt a bit! Drop a little Freezone on an aching corn, instantly that corn stops hurting, then you lift it right out. Yes, magic! No humbug!

A tiny bottle of Freezone costs but a few cents at any drug store, but is sufficient to remove every hard corn, soft corn, or corn between the toes, and the calluses, without soreness or irritation. Freezone is the sensational discovery of a Cincinnati genius. It is wonderful.

"DEADMAN'S CURVE" TO BE STRAIGHTENED.

County Judge F. A. Bullock, at a meeting of the Fayette Fiscal Court Wednesday morning, instructed County Road Engineer F. E. Kurzenknebe to make a survey and prepare an estimate of the expense which would be entailed in straightening "Dead Man's Curve," three miles from Lexington on the Maysville road. The curve has been the scene of nearly a score of accidents within the past few years.

THE ALLIED AMERICAN ASSOCIATION'S STATES VIEWS

Steps have been taken to check the flood of population pouring into the cities from the farms at the time when the war's greatest need is to increase the acreage producing farm crops, an association having been formed, with governors of many States on the Advisory Board, to present farm opportunities in a novel and sweeping way.

The announcement that the Allied American Association, with headquarters in Chicago, has completed the enlisting of over a thousand daily newspapers and over a thousand motion picture theatres in the task of arousing communities to take up locally and vigorously as Liberty Bond campaigns, efforts to increasing food production, is another victory won at the same time that Pershing's armies and the French drove the German's drive backward in a smashing defeat.

"The rush to the cities has become an ominous flood when already the urban population of the United States has increased to 55 per cent, of the total instead of the 30 per cent. in 1880, the 44 per cent in 1890, and, to go back to early days, to the 13 per cent. of Colonial days," said President Ward D. Williams, of the Allied American Association. The trouble is that people do not realize that farm life to-day can be altogether different to farm life ten or twenty years ago, to say nothing of primitive times. When we have produced a motion picture epic which the Committee on Public Information will release it will be possible for city people to visualize what they can have and how they can live on a farm. By our distribution of that and other pictures and the publicity which has been agreed to by our newspaper membership, a check will be given the rush to the cities in mistaken search for better living and greater opportunities. There will be dozens of other films which the enlisted newspapers will announce to their communities and which will be used to make the feature of public and patriotic occasions.

"The great war problem of labor is to create an incentive to greater efforts and this can be done, we know from experience, by means of motion pictures provided there is co-operation by the daily newspapers in getting great audiences to see the pictures and at the same time hear the story told of the need for more acreage in crop and more crop per acre.

"What we need is public co-operation with the work which already has been done quietly in getting our great regiment of newspapers and our regiment of 'movie' theatres enlisted for the more food drive.

"Let us not forget that the signs with which Uncle Sam has plastered public buildings from the Atlantic to the Pacific 'Food Will Win the War' will have significance after the victorious conclusion of the war, whenever that may come. The world is short of foodstuffs and it is to the United States and Canada that the hungry and starving nations must continue to look for years and years. High prices of all that the farm produce will continue and are right now filling the banks with farmers' money. Farmers are prospering as never before and their prosperity is the foundation stone of our national future in commerce and industry.

"The great campaign to show the opportunities of States in the East, West, North and South, to the millions of people who will be reached by the Allied American Association's regiments of enlisted institutions will serve as a means by which to arouse, as they need to be aroused, the communities in the United States to genuine, war-time zeal in campaigning for more food as they have campaigned for Liberty Bonds. Communities have been leaving the crop problem too much to Uncle Sam.

"Let it not be forgotten that the newspapers of America are trying to make their public realize that the future of those communities, for growth or decline, depends upon their response to the call to win the war. They will be able, through our plans, to swing the motion pictures into the work of compelling 100 per cent. devotion to all the calls of war and particularly increasing crops and acreage throughout the land.

"Owners of big tracts of land, railroads and other big interests can get definite results now by joining in the program of action of the most dynamic kind."

The States represented on the Advisory Board of the Association which has worked out this public service program are: Minnesota, South Dakota, Nebraska, Kansas, Iowa, Texas, North Carolina, Mississippi, Alabama, Arizona, Georgia, Florida, West Virginia, Arkansas, Utah, New Mexico, Oregon, South Carolina, Nevada, Wyoming, Missouri.

If the Senate believe President Wilson already has authority to take over wires, why does it object to giving him that right by statute?

GOVERNMENT CONTROL ASKED FOR STOCK YARDS, ETC.

WASHINGTON, August 12.—Government acquisition and control of all the principal stock yards, cold storage plants and warehouses, and both refrigerator and cattle cars has been recommended to the President by the Federal Trade Commission to destroy a monopoly which, it declares, Swift & Co., Armour & Co., Morris & Co., Wilson & Co., Inc. and the Cudahy Packing Company exercise not only over the meat industry of the country, but other necessary food supplies.

The commission's report is based upon exhaustive hearings conducted recently in many cities and was made public Thursday through the White House. It has been in the hands of the President since July 5, and it was explained that it had not previously been issued "because the President wished first to be in possession of full information."

Basing its statement upon a great volume of evidence examined, much of it taken from the confidential files of the packing companies, the commission said the power of the packing companies "has been and is being unfairly and illegally used."

To manipulate live stock markets. To restrict interstate and international supplies of food. To control the prices of dressed meats and other foods.

To defraud both the producers of food and consumers.

To crush effective competition. To secure special privileges from railroads, stock yard companies and municipalities, and

To profiteer. "While we have found," said the commission's report to the President, "and will disclose to you an intricate fabric of monopolies, controls, combinations, conspiracies and restraints which would seem to indicate a similarly complex and minute system of legislative or administrative remedy, we believe that an adequate remedy may be more simply arrived at."

"We believe that if the fundamental and underlying evils are rooted out the whole structure of conspiracy, control, monopoly and restraint must fall.

If these five great concerns owned no packing plants and killed no cattle and still retained control of the instruments of transportation, of marketing and of storage, their position would be no less strong than it is."

The commission then recommended: "1. That the Government acquire, through the railroad administration, all rolling stock used for the transportation of meat animals and that such ownership be declared a Government monopoly.

"2. That the Government acquire, through the railroad administration, the principal and necessary stockyards of the country, to be treated as freight depots and to be operated under such conditions as will insure open, competitive markets, with uniform scale of charges for all services performed, and the acquisition or establishment of such additional yards from time to time as the future development of livestock production in the United States may require. This to include customary adjuncts of stockyards.

"3. That the Government acquire, through the Railroad Administration, all privately owned refrigerator cars and all necessary equipment for their proper operation and that such ownership be declared a Government monopoly.

"4. That the Federal Government acquire such of the branch houses, cold storage plants and warehouses as are necessary to provide facilities for the competitive marketing and storage of food products in the principal center of distribution and consumption. The same to be operated by the Government as public markets and storage places under such conditions as will afford an outlet for all manufacturers and handlers of food products on equal terms. Supplementing the marketing and storage facilities thus acquired, the Federal Government establish, through the Railroad Administration, at the terminals of all principal points of distribution and consumption, central wholesale markets and storage plants with facilities open to all upon payment of just and fair charges."

CATARRHAL DEAFNESS CANNOT BE CURED

By local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure catarrhal deafness, and that is by a constitutional remedy. Catarrhal deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, deafness is the result. Unless the inflammation can be reduced and this tube restored to its normal condition, hearing will be destroyed forever. Many cases of deafness are caused by catarrh, which is an inflamed condition of the mucous surfaces. Hall's Catarrh Medicine acts through the blood on the mucous surfaces of the system.

We will give One Hundred Dollars for any case of Catarrhal Deafness that cannot be cured by Hall's Catarrh Medicine. Circulars free. All Druggists, 75c.

LOANS TO OUR ALLIES.

With another credit of \$100,000,000 to Italy and \$9,000,000 more to Belgium the credits advanced by the United States to our allies now total \$6,380,000,000.

With government encouragement, extensive experiments will be made with a view to reviving the growing of flax in Scotland.

ELECTRICITY DOING WAR DUTY

War necessities and the regular order of "industrial development" are in open conflict, since the latter is officially curtailed but is, nevertheless, extremely active in the production of the new necessities demanded for the great world conflict. Manufacturing plants have been springing up over night in every part of the country. These industries have taken the short cut in obtaining power, and instead of erecting great plants of their own, as in past years, they have usually annexed themselves to the existing institutions, and the information given out in Washington shows that upwards of sixty per cent of the industrial and factory power in the country is furnished by electric light and power companies.

An interesting feature of the condition shows that practically all of the so-called electric steel is manufactured through the medium of the electric furnace. These furnaces are largely operated with electricity furnished by lighting and power plants.

These facts have been brought out through the War Finance Corporation, which as a part of the war machinery of the national government has been as closely in touch with the industrial end of the United States as is the Federal banking system with the financial conditions.

There isn't very much going on nowadays but what Uncle Sam knows all about.

CONFEDERATE PENSIONERS BEING THINNED OUT BY DEATH.

FRANKFORT, KY., Aug. 12.—Thirty-five Confederate pensioners are reported as having died since the last quarterly distribution. In the November distribution the pensioners will receive \$37.50 instead of \$30, the rate of \$12.50 monthly going into effect this month.

The following have been added to the list, to whom pensions will be paid August 15:

Mary A. Bibb Allensville; Bonnie T. Bowden, Paducah; Sally A. Combs, Ned; Theodore Cowherd, 239 Haldeman avenue, Louisville; Mary E. Curl, Cynthia; Samuel J. Denton, 2217 Lytle Street, Louisville; Martha C. Daw, Canton; L. S. Dunning, Wallonia; Bettie E. Embry, Irvine; Sylvia Glassco, Spottsville; Lucy Ann Hodges, Cynthia; Amanda I. Hughes, Mayfield; Sarah J. Jackson 2504 Rowan Street, Louisville; Mollie H. Jones, Shelbyville; Sally Kelly, Frankfort; Lucy Miller, Maceo; Mary E. Patterson, Princeton; Emily E. Potts, Paducah; Martha P. Randle, Hopkinsville; Katherine Sublett, Bowling Green; Mona Tracey, Frankfort; Mattie J. Weddington, Hopkinsville; Artimise Yancy, Sadieville; Della Young, 780 South Sixth Street, Louisville; Wilson T. Combs, Noble; Sarah P. Hair, Lexington; W. J. Ross, Glasgow; Susanna Turner, Kevil; Nancy C. Bagdon, Dycusburg; Sarah M. Boone, Lexington; Susan H. Burnett, 431 South First Street, Louisville; Mary Harris, Paintsville.

TO IMPROVE YOUR DIGESTION.

"For years my digestion was so poor that I could eat only the lightest foods. I tried everything that I heard of to get relief, but not until about a year ago when I saw Chamberlain's Tablets advertised and got a bottle of them did I find the right treatment. Since taking them my digestion is fine."—Mrs. Blanche Bowles, Indiana, Pa. (adv-aug)

To make a kitchen stove help warm the room in which it is used a metal cover that radiates the heat evenly has been patented.
